

School Text Responses

School: SHIOCTON EL

District: SHIOCTON

City: SHIOCTON **State:** WI - Wisconsin

Survey Dates: Feb 1 2007 through Feb 28 2007

Condition: Forward-Thinking, Shared Vision

Indicator: Digital-Age Vision for Learners

Question: Describe your district's vision for education technology:

... Our district is very involved in all areas of technology. We have a distance learning lab as well as reoccurring referendum that keeps all our computer labs up to date with all the latest technology and the ability to purchase all equipment and software needed.

Question: Describe your school's vision for education technology:

- ... We have very professional people working hard to give our school the best.
- ... The mission of the School District of Shiocton is to enhance a continuous learning experience for our students through a fostering of community school partnerships and developing learning and social skills in a physically and emotionally safe environment while preserving and promoting the dignity and rights of all individuals.
- ... I have no clue. All I can tell you is that technology is basically on our own. We have to think it, act on it, and then see if it is possible with the "so called, technology instructor".
- ... I do not know what the vision is for intermediate age children is at our school.
- ... I think our vision is right on track and hopefully will continue.
- ... The school's vision for education technology is to allow all students to benefit as much as possible in as many ways as they can. The teachers are given many opportunities to learn new techniques.
- ... To teach the students how to use computers in the workplace and every day situations for today and the future.
- ... I don't know???
- ... Student's learning, applying and responding to our world's ever changing technologies.
- ... Follow the leader.
- ... We are not all on the same page. Some use it a lot. Others rarely.
- ... Keep up w/ the times
- ... teachers can use technology as they wish. Limited expectations.
- ... Students will be prepared to function as productive citizens.
- ... We stay at the current times by updating computers with new programs, and offer training when needed. Our vision is to stay current and competitive.
- ... We are strongly encouraged to use technology everyday. We are given opportunities to develop our talents in using technologies.
- ... The school wants to have the technology available for teachers and students to make sure none of us are held back by limitations in the technology area, How we use this technology is generally up to each individual teacher/student within the technology agreement.
- ... I feel that our school has strong vision for education in technology both for students and staff, as evidenced in the reinstatement of keyboarding classes for fourth and fifth graders.
- ... I am disappointed in the school's commitment to use tech funds to train staff. Minimal concern is demonstrated in this area.
- ... Keep current with today's technology to benefit our students.
- ... Keep current with today's technology that best benefit our students.
- ... Very good. Teachers are encouraged to get as much tech education as possible. They encourage students to use it in their lessons.
- ... Our school is working now to enhance what we already have. We are progressive!
- ... We would like to use computers as much as possible to help fill in gaps in students' education.

... I believe our school's vision is at the beginner stage. We have wonderful support and adequate experts to help us. I believe we are trying to take steps to implement more technology into our classrooms.

... Our school sees the importance of educational technology. We are adequately funded, but could use more time to keep up to date on training.

... We have several computer labs in use, but not enough time in the day to use them. We use several programs to track student progress from year to year and subject to subject.

... Our school sees technology as the way of the future

... Our vision includes utilizing technology to assess student learning, monitor student growth, establish grade level goals, classroom goals, individual goals, and targeted student goals, reinforce skills in reading and math, provide stimulating learning opportunities via programs and/or on-line resources, and research data and/or information.

... The school's vision is to prepare our students for the future by providing the skills necessary to promote literate, competent, self-reliant, and productive citizens. Through the effective use of technology, our school will offer students, staff, administration and community members the opportunity to develop lifelong learning skills.

Question: If the answer to the item above was “Aware” or “Very aware,” please describe the school’s vision for technology in your own words:

... always looking for better and mor effective ways to teach

... The school envisions every student be computer literate and offers many classes for this. Many teachers give assignments that students must use computers for. We have many computer labs in our school.

... We have a technology committtee and receive new up to date equipment each year with our yearly referendum monies.
