

May 21: Safe and Secure Entrances and Infrastructure

Safe and Secure Entrances

1. How do you hope this project will improve daily life in our school building?

Security and safety – less stress on staff	
Signage for new entrances	

2. What are the most important things you believe the new school office should offer to our students, staff, and families?

Avoid students allowing visitors to enter	
Improved workflow	

3. How would you describe a welcoming and supportive school office environment for our community?

Able to change security options	Safe and Secure
Visitors are able to find offices (HS on the end of building)	Evolution

4. What concerns, if any, do you have about the safety and security of the school, and how would you like to see them addressed in the new office design?

Separate space for confidentiality – able to meet in conference rooms, not always at desk	Sound proof walls
HS Office Windows - Better view of student parking lot	

5. In your opinion, what does a secure but still approachable school entrance look like?

Windows – Clear line of sight	use “S” Logo & “Shiocton” green
Outside transition into the building	clear signage and direction
Allow natural light	open space
Elementary outdoor courtyard at entrance for pickup/drop off	

May Building Planning
Community Feedback

Safe and Secure Entrances	
1. How do you hope this project will improve daily life in our school?	
Clean water	Lower Monthly bills
No leaking roofs	
2. When it comes to plumbing and electrical upgrades, what should be our top priorities from your perspective?	
Have Backup systems - generators, drinking water	
Electrical upgrade for safety	
Drinking water – testing and upgrading implementing water treatment options if needed	
3. What features or improvements would make these systems more reliable or efficient for our community's needs?	
Updating/upgrading with growth in mind	
4. In your view, what does a future-ready plumbing or electrical system look like in a school or public building?	
Clean water	Quiet equipment
Upgradable equipment	Upgraded heat/air control
5. What makes a successful renovation project in your eyes—beyond just fixing pipes and wires?	
Energy efficiency with bills	
Improved lighting
